I. Reading Comprehension (60%)

(A) The increasing cost of energy has caused many companies to make permanent changes in their offices. On a small scale, office managers are purchasing energy-efficient office machines and encouraging recycling programs to cut energy costs. On a larger scale, architects and builders are responding to the demands of companies for more energy-efficient buildings.

Buildings constructed or renovated in the last few years have incorporated energy-saving measures. Office maintenance workers have sealed cracks around windows and doors. Builders have installed sets of double doors to reduce the exchange of indoor and outdoor air when doors are opened.

This has reduced transfer of air in and out of the building. While it has had cost-saving benefits, it has caused personnel-related costs such as increased employee absences due to illness. Since the interior air is recirculated and little fresh air is allowed in, everyday contaminants such as dust and germs remain in the air. Employees in energy-efficient buildings breathe the same air again and again. They suffer from an increase in headaches, colds, dry skins, and dry throats, and in severe cases respiratory problems.

1. Why was the construction of office building changed?
 - (A) To make construction easier.
 - (B) To use better building materials.
 - (C) To reduce energy consumption.
 - (D) To make the offices more attractive.
2. How is construction different now?
 - (A) Offices have fewer entrances.
 - (B) Windows and doors fit tightly.
 - (C) Air conditioning has been eliminated.
 - (D) Sprinkler systems are used.
3. What unexpected problem has this caused?
 - (A) It takes longer to enter the building.
 - (B) Employees are not warm enough.
 - (C) Offices cannot be cleaned.
 - (D) More workers take sick leave.
4. What illness increased among workers in these buildings?

(A) Headaches	(B) Muscle aches
(C) Rashes	(D) Nausea

II. Summary and Arguments (40%)

Please read the article and answer the following three questions:

A serious problem faces America today, a problem of such grave importance that our very existence as a nation is threatened. We must either cleanse our schools of evil-minded books, or we must either reconcile ourselves to seeing our children become welfare moochers and homeless bums.

History has shown time and time again that placement of immoral books in our schools is part of insidious plot designed to weaken the moral fiber of our youth from coast to coast. In Wettuckett, Ohio, for example, the year after books by Mark Twain, such as *Tom Sawyer* and *Huckleberry Finn*, were introduced into the school library by liberal free-thinkers and radicals, the number of students cutting classes rose by 6 percent. And in that same year, the number of high school seniors going on to college dropped from thirty to twenty-two.

The reason for this could either be a natural decline in intelligence and morals or the influence of those dirty books that teach our beloved children disrespect and irresponsibility. Since there is no evidence to suggest a natural decline, the conclusion is inescapable: once our children read about Twain's characters skipping school and running away from home, they had to do likewise. If they hadn't read about such undesirable characters as Huckleberry Finn, our innocent children would never have behaved in those ways.

Now, I am a simple man, a plain old farm boy – the pseudo-intellectuals call me redneck just like they call you folks. But I can assure you that, redneck or not, I've got the guts to fight moral decay everywhere I find it, and I urge you to do the same. For this reason I want all you good folks to come to the ban-the-books rally this Friday so we can talk it over. I promise you all you right-thinking neighbors will be here.
